ADAYEHI JONATHAN

GEOGRAPHER
AND
SOFTWARE ENGINEER

ABOUT ME

A software engineer specializing in web and mobile app development, I excel at integrating innovative solutions with user-friendly designs. My strengths include

Hard work, creativity, teamwork, Problem-solving, time management, and effective communication. With a strong work ethic and commitment to continuous learning, I stay at the forefront of technological advancements. Additionally, as a dedicated geographer, I leverage geographic data to address complex challenges. My unique blend of skills enables me to create cutting-edge applications that bridge technology and geography.

EXPERIENCE

- **Led online coding classes for university and secondary school students:** fostering technical skills and inspiring the next generation of programmers.
- **Developed robust portfolio websites for clients**, delivering tailored, user-friendly digital solutions that enhance their professional presence.
- **Created a comprehensive school website using PHP and database integration,** streamlining administrative processes and improving user experience.
- **Built an advanced image detection app,** showcasing expertise in cutting-edge technologies and practical application of machine learning algorithms.
- **Produced detailed maps for university students' final year projects**, demonstrating proficiency in geospatial analysis and cartographic design.
- **Utilized GIS as a Decision Support System (DSS) for planning,** leveraging spatial data to inform strategic decision-making and optimize resource allocation.

EDUCATION

- **B.Sc. in Geography and Planning**
University of Jos

- **Backend Website Development**
ALX Software Engineering Program

- **Frontend Website Development**
Meta Frontend Development Program

- **Cybersecurity**
Google Cybersecurity (In Progress)
